Sanjay Bhaambhu

Engineering Lead · Mobile & Web

Gurugram, India · open to relocating to Europe, or remote · bhaambhu@gmail.com · +91 89292 99992 · bhaambhu.com · github.com/bhaambhu

Engineering lead with 10 years of building software and four years of teaching it. At a mutual fund house I lead a team of five to six building apps for 300,000+ investors: I set the documentation, testing and release standards, turn regulatory circulars into delivery plans, and still write the code. I hold a PhD in intelligent tutoring systems and have shipped products end to end on my own.

EXPERIENCE

Senior Manager – Software Developer · PPFAS Asset Management (Parag Parikh Mutual Fund) Feb 2023 – present

- Lead a team of 5–6 engineers building PPFAS's investor and corporate apps in React Native (Expo), Next.js and Remix.
- Own the release cycle end to end: release planning, App Store and Google Play submissions, OTA updates and release notes.
- Built the corporate investor portal app and a helpdesk that replaced Salesforce (a licence of about ₹90 lakh, ≈ €90,000, a year) as solo projects, from requirements to rollout.
- Defined the team's documentation, testing (Jest, Appium) and release standards and streamlined CI/CD.
- Translate SEBI regulatory circulars into development scope and timelines; currently leading WCAG accessibility upgrades.

Senior Research Fellow (UGC SRF) · Chaudhary Devi Lal University, Sirsa Oct 2018 – Jan 2023

- Designed and built CAPTAIN, an adaptive learning platform (Django and PostgreSQL API, Next.js staff app, React Native learner app) that models topics as a prerequisite graph, as part of my PhD.
- Published 4 papers in indexed journals and presented 3 at international conferences on learner profiling and question classification.
- Taught Data Structures, Advanced Algorithms and Compiler Design to MTech and MCA students.

Web Developer · OOPS InfoSolutions Sep 2016 – Oct 2018

- Built full-stack client applications in PHP/MySQL and Java/PostgreSQL with responsive JavaScript front ends.
- Designed application architectures and led client-facing prototypes and demos, turning business needs into working software.

SELECTED PROJECTS

Sarkari Academy · sarkariacademy.com

Laravel · PostgreSQL · React/Inertia · TypeScript · Expo

- Built alone and launched in 2026: a government-job platform for India that matches candidates to jobs they are eligible for; 260+ live notices from 184 recruiting bodies.
- Built the staff tooling that keeps the catalogue current: structured notice editing, automatic validation and duplicate detection, and review before anything is published.

SHADES: Combat · bhaambhu.com/shades

Unity · C# · real-time multiplayer

- 3D shooter for Android built alone: 1.5M players and a 4.5-star rating from 21,000+ reviews; LAN and online multiplayer with shared-state concurrency, enemy AI and in-app purchases.

SKILLS

Leadership: Team lead, release management, engineering standards, regulatory scoping (SEBI), mentoring, university teaching

Engineering: React Native, Expo, React, Next.js, TypeScript, Laravel, Django, PostgreSQL

Delivery: App Store & Google Play, OTA updates, CI/CD, Jest, Appium, Sentry

EDUCATION

PhD, Computer Science & Engineering (AI in education) · Chaudhary Devi Lal University, UGC SRF 2018 – 2022

Master of Computer Applications (MCA) · Kurukshetra University 2014 – 2017

BSc Computer Science · Chaudhary Devi Lal University 2011 – 2014

Languages: English (fluent), Hindi (native)
