Sanjay Bhaambhu

Senior Full-stack Engineer · Web & Mobile

Gurugram, India · open to relocating to Europe, or remote · sanjay@bhaambhu.com · +91 89292 99992 · bhaambhu.com · github.com/bhaambhu

Full-stack engineer with 10 years of building production software across web, mobile and backend. At a mutual fund house I own the apps used by 300,000+ investors, and on my own I built Sarkari Academy: a live job platform with a Laravel and PostgreSQL core, a React web app, staff tools and an Expo mobile app, covered by about 1,200 automated tests.

EXPERIENCE

Senior Manager – Software Developer · PPFAS Asset Management (Parag Parikh Mutual Fund) — Feb 2023 – present

- Own PPFAS's investor and corporate apps end to end; I mentor a junior developer and our QA tester.
- Built and maintain SelfInvest, the React Native app 300,000+ investors use on Android and iOS to buy, redeem and track mutual fund investments.
- Hardened the fintech apps: root and debugger detection, mock-location blocking, encrypted storage and leaner API traffic.
- Migrated legacy apps from JavaScript to TypeScript and from Context to Redux (with Redux-Saga), and refactored them for maintainability.
- Own the release cycle end to end: release planning, App Store and Google Play submissions, OTA updates and release notes.
- Built a custom helpdesk on my own that replaced the Salesforce helpdesk, removing a licence of about ₹90 lakh (≈ €90,000) a year.
- Built the corporate investor portal app on my own, used by PPFAS's enterprise clients.
- Defined the team's documentation, testing (Jest, Appium) and release standards, streamlined CI/CD, and now lead WCAG accessibility upgrades.

Senior Research Fellow (UGC SRF) · Chaudhary Devi Lal University, Sirsa — Oct 2018 – Jan 2023

- Designed and built CAPTAIN, an adaptive learning platform (Django and PostgreSQL API, Next.js staff app, React Native learner app) that models topics as a prerequisite graph, as part of my PhD.
- Published 4 papers in indexed journals and presented 3 at international conferences on learner profiling and question classification.

Web Developer · OOPS InfoSolutions — Sep 2016 – Oct 2018

- Built full-stack client applications in PHP/MySQL and Java/PostgreSQL with responsive JavaScript front ends.

SELECTED PROJECTS

Sarkari Academy · sarkariacademy.com

Laravel · PostgreSQL · React/Inertia · TypeScript · Expo

- Built alone and launched in 2026: a government-job platform for India that matches candidates to jobs they are eligible for; 260+ live notices from 184 recruiting bodies.
- One Laravel service layer serves the React web app, a staff panel and a REST API for the mobile app, so business rules live in one place.
- Built the staff tooling that keeps the catalogue current: structured notice editing, automatic validation and duplicate detection, and review before anything is published.
- Eligibility engine evaluates AND/OR qualification rules, age cut-offs and category relaxations, and drives a personal feed with email and push (FCM) alerts.
- Expo Android app in Play testing: Google sign-in, OTA release channels per build type, and a server-controlled update gate that can force store updates.
- About 1,200 automated tests; deployed with Coolify behind Cloudflare, monitored in Sentry.

NativePing · nativeping.com

Laravel · PostgreSQL · React · npm SDK for React Native

- Push notification platform for React Native apps: a one-line npm SDK registers devices; developers segment users by custom attributes (PostgreSQL JSONB) with live audience estimates and send targeted campaigns.
- Delivery runs as queued jobs that batch requests to the Expo Push API and record an outcome per device, with live progress in the dashboard.

SHADES: Combat · bhaambhu.com/shades

Unity · C#

- Android multiplayer shooter built alone: 1.5M players, 4.5 stars from 21,000+ reviews.

SKILLS

Frontend: React, TypeScript, Next.js, Remix, Inertia.js, Tailwind CSS, shadcn/ui, accessibility (WCAG)
Mobile: React Native, Expo & EAS, TypeScript, Redux, OTA updates, App Store & Google Play releases
Backend: Laravel (PHP), Django (Python), Java/Spring Boot, PostgreSQL, MySQL, queues, REST APIs, Kafka (learning projects)
Tooling: Git, CI/CD, Pest/PHPUnit, Jest, Sentry, Cloudflare, Coolify

EDUCATION

PhD, Computer Science & Engineering (AI in education) · Chaudhary Devi Lal University, UGC SRF — 2018 – 2022
Master of Computer Applications (MCA) · Kurukshetra University — 2014 – 2017
BSc Computer Science · Chaudhary Devi Lal University — 2011 – 2014

Languages: English (fluent), Hindi (native)
